

# NB4LE Residual Current Operated Circuit Breaker (Electronic)

## 1. General

#### 1.1 Function

Personnel and fire protection: Cable and line protection against overload and short-circuits.

#### 1.2 Selection

## Rated residual operating current

 $I\Delta n\,$  = 30mA, additional protection in the case of direct contact.

# RCD Type

#### Type A

RCD Type A is ensured for sinusoidal, alternating residual currents as well as for pulsed DC residual currents, whether they be quickly or slowly increase.

#### **Tripping curve**

B curve (I1=1.13In; I2=1.45In; I4=3In; I5=5In) protection and control of the circuits against overloads and short-circuits; protection for people and big length cables in TN and IT systems.

C curve (I1=1.13In; I2=1.45In; I4=5In; I5=10In) protection and control of the circuits against overloads and short-circuits; protection for resistive and inductive loads with low inrush current.

BK curve (I1=1.05In; I2=1.3In; I4=3In; I5=5In) protection and control of the circuits against overloads and short-circuits; protection for people and big length cables in TN and IT systems.

CK curve (I1=1.05In; I2=1.3In; I4=5In; I5=10In)protection and control of the circuit against overloads and short-circuits; protection for resistive and inductive loads with low inrush current.

#### 2.3 Temperature derating

The maximum permissible current in a circuit breaker depends on the ambient temperature where the circuit breaker is placed. Ambient temperature is the temperature inside the enclosure or switchboard in which the circuit breakers are installed. **The reference temperature is 30°C** 

| Temperature   | -10°C | 0°C  | 10℃  | 20°C | 30℃  | 40°C | 50℃  | 60°C |
|---|-------|------|------|------|------|------|------|------|
| Temperature compensation coefficient of rated current | 1.20  | 1.15 | 1.10 | 1.05 | 1.00 | 0.95 | 0.90 | 0.85 |
