

Danabridge V3

The Danabridge V3 enables remote access to your home by providing your Danalock V3 smart lock with internet connection. Operate your Danalock from anywhere with your smartphone.

Simple setup

Plug the Danabridge V3 into a power outlet and connect it to your home Wi-Fi – then it is ready to be paired with your Danalock V3. Remember to place it within Bluetooth range.

Operate remotely

Connect your Danalock V3 smart lock to Danabridge V3 and control and operate your Danalock from anywhere. Enjoy the added convenience of letting family members, friends and home service providers in – even when you're not at home.

Monitor your home

When your Danalock V3 is connected to the Danabridge V3, you will always know, when the lock is used – and by whom. Check your lock's real-time status from anywhere in the 24/7 activity log.

Strong security

The Danabridge V3 is part of the Danalock ecosystem, using an advanced encryption method for transferring data (AES 256).
