# 36W LED PANEL LIGHT

300x1200mm| IP41   SKU:SRPL300X1200-36WH

INFORMATION

Measuring 300mm x 1200mm, this IP41 rated 36W panel light typically replaces 4 x 1200mm T8/T5 fluorescent tubes lights set in 300x1200 grids. Which is why they're the popular lighting choice for hotels, factories, offices, schools, colleges, hospitals and the like. Energy use will be reduced by up to 50% and you'll notice a dramatic improvement in light quality.

While fluorescent tubes tend to flicker towards the end of their life, panel lights maintain their brightness and quality for a much longer period and these 36w units could use a Philips flicker free LED driver for improved uniformed light distribution with no interference.

They also last far longer. This 36W panel will give you 49,999 hours of service, which is up to 20 times longer than your older light source.
