Easy set-up

We focused on simple, convenient and quick configuration of **FIBARO Roller Shutter 4**.

- Entire set-up process is available in Yubii Home app with a brand new setup wizard.

- There is no need to use a computer, everything is available on your smartphone.

- The wizard will guide you step by step through the process of adding a device and its configuration.

See the new possibilities of
FIBARO Roller Shutter 4

Simple device grouping with the possibility to define a group of devices, so that one controller becomes a master one

Two operation modes available:
Click-to-move and Hold-to-move

Motor testing (up&down) and change of buttons orientation and motor polarity, without modification in wire set-up
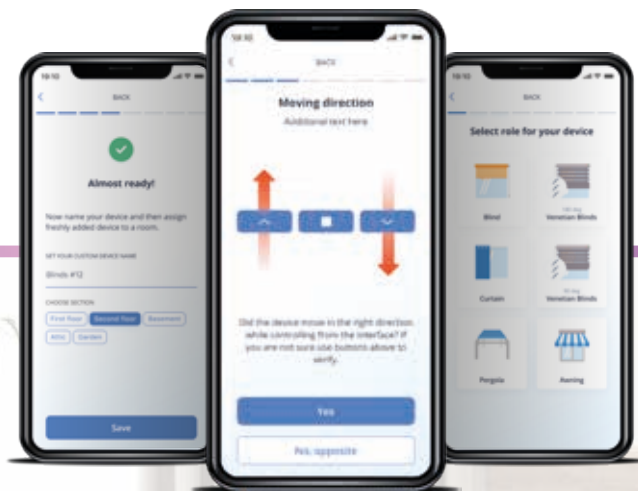

Double-click launches a favorite position (works both for roller shutter and/or slats)

Ability to set-up a virtual end
(virtual limit switch)

Compatibility with other hubs manufacturers

FIBARO
a **Nice** company

Meet the new
Roller Shutter 4
Shutter, ventian blind, awking and pergola controller.
Installation as easy as never before

We have made the installation of FIBARO Roller Shutter 4 as easy as possible. Configuration process and device possibilities are key devices' advantages.

Meet the Roller Shutter 4:

- One of the smallest shutter controllers available

- Equipped with Z-Wave 800 chip to provide better range

- Safe - made with high quality components and compliant with highest standards
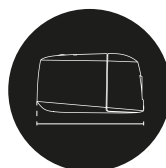

- Easy to install and set-up

FIBARO Roller Shutter 4
key features:

NEW DEVICES DESIGN

We focused on easy installation and intuitive first run. There are more inputs for N and L wires, so that allows opt-out from using splicing connectors.

SMALLER DEVICE

Device's shape and dimension enable easy and fast installation in flush-mounted boxes. Button and the diode are easily accesible.

EQUIPPED WITH PLUG CONNECTORS

Enable even faster assembly - no need to use screw driver.

WORKS WITH MANY TYPES OF BLINDS SWITCHES

The device fits most of roller shutters and blinds switches' types available on the market.

3 EXTRA CONNECTING CABLES INCLUDED IN THE BOX

Additional wires to connect the button are included.

We have created a module that can be installed incredibly fast.

There is no need to use WAGO splicing connectors. You save the space in the box and shorten installation time thanks to push-in wire connector.

PUSH-IN WIRES CONNECTOR
faster assembly with tool-free terminal

DIODE
